

CLAIMS:

1. A molded food product comprising a core formed of creamy or crumbly soft cheese or non-frozen milk product wherein its dry extract content lies in the range 25% to 50%, its fat content in the dry extract lies in the range 30% to 75% by weight, and its pH lies in the range 4.8 to 6, said core being molded into a predetermined three-dimensional shape, and a coating surrounding said core and imparting mechanical strength and/or non-stick properties to the molded food product.
2. A product according to Claim 1, having a coating imparting mechanical strength and/or non-stick properties to the product in packaging.
3. A product according to Claim 2 in which the product is in a non-congealed state at a temperature in the range of 2°C to 8°C and is held together by said coating.
4. A product according to Claim 1 including a stick extending from the food product.
5. A product according to Claim 1 wherein said coating is of a harder consistency than said core.
